Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This communication is in response to Applicant's RCE filed on 07/03/2007.
2. Claims 1-585 are pending.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-41, and 45-51 drawn to an information management system, classified in class 726, subclass 30.

Group II. Claims 42-44 drawn to a storage device, having the function of copying with a computer virus, classified in class 726, subclass 22.

Group III. Claims 52-56 drawn to a data processing system which has the ability to deal with infection, classified in class 726, subclass 24.

Group IV. Claims 57-61 and 62-66 draw to a method of dealing with infection of a file, classified in 714, subclass 38.

Group V. Claims 67-110 draw to a virus scanner, classified in 709, subclass 246.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions I, II and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP 806.05 ©). In the instant case, the combination as claimed does not require the particulars of

the subcombination as claimed because they are patentably distinct and are shown to be separately usable. The subcombinations have separate utility such as transaction system, digital certification validation and system for providing services.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and III, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48 (b) by the fee required under 37 CFR 1.17 (i).
